

## A Focus on Absolute Uncorrelated Returns

### Low Beta Long Short Equity Strategy

The objective of this strategy is to deliver absolute returns that are uncorrelated to traditional asset classes. It aims to generate capital appreciation while remaining Beta neutral by maintaining a net long position in low beta equities hedged with the S&P500 (using SPY) to deliver uncorrelated returns. It deploys gross leverage of typically < 2:1 and targets volatility similar to the S&P500. Typical characteristics of long positions include low stock volatility, economically insensitive business, strong operating margins, low leverage, and market cap > \$1 billion.

Strategy usually has 15-20 positions sized based on the discount to present value of cash investors can extract over the life of the business.

The high absolute returns for a strategy uncorrelated to traditional asset classes should be noted by hedge fund investors whose alternative remains a hedge fund industry that has generated no returns for clients while being highly correlated to equity markets.

### SL Advisors Low Beta Long-Short Strategy

Low Beta Long-Short is more concentrated than Hedged Dividend Capture ("DivCap") with added leverage and is not restricted to dividend paying stocks. It includes our best ideas from DivCap weighted according to conviction rather than diversified, equal weight allocations. It is managed to be beta neutral and returns are driven very largely by individual stock selection. Interactive Brokers is custodian for assets in this strategy only.
